Exhibit A
SCOPE OF SERVICES

Overview. The services funded through this contract will help to provide a single point of entry for mental health and substance abuse assessments for individuals in need of urgent psychiatric and/or substance abuse assessment and be referred to herein as the Crisis Assessment Center (CAC). Assessment and crisis intervention services will be provided to individuals age 14 and over who present in psychiatric crisis or as intoxicated. They may be referred by MPD CIT officers, other law enforcement/criminal justice personnel, community provider staff, family or self referral (walk-ins).

Intake. Staff must use an expedited process to immediately accept responsibility for clients who present to the facility on their own or who are transported to the facility by law enforcement personnel, the Memphis Police Department Crisis Intervention Team, family members or others. No individual needing social detoxification or psychiatric evaluation may be refused services. The intake process must provide one registration for all services and must accommodate multiple clients to prevent any undue backlog in access to the service. Information will be obtained from the referral source (including transporting officers and family members) regarding reason for referral, and will include:

- a. Full name; social security number; date of birth; address; phone number; family member/significant other's name, address and phone number; emergency contact's name, address and phone number; and other demographic information
- b. chief complaint, history of problem
- c. any known history regarding psychiatric and/or substance abuse problems or treatment
- d. counselor/case manager (if any)
- e. any known medical/legal problems

- g. any information required by other funding sources

Triage Assessment. The primary goal is to determine the most clinically appropriate, least restrictive intervention and disposition, based on presenting symptoms at the time of assessment and considering psychiatric, medical and substance abuse problems and contributing psychosocial issues. Additionally, this assessment is intended to stabilize the current crisis and prevent further dysfunction, deterioration or exacerbation of symptoms so that the individual, to the extent possible, can mobilize community resources and supports.

The initial assessment will include a determination of level of supervision required by each individual who presents for service. Ensuring safety and security is the top priority until the assessment is complete and an intervention and/or disposition decision is made.

Substance Abuse Assessment. Substance abuse assessment must provide preliminary medical and psychiatric assessment of individuals presenting with evidence of a level of intoxication that presents an immediate danger to self or others. Consumers found to be at risk for immediate withdrawal will be transferred to an emergency unit for medical detoxification services. Behaviors appropriate for triage, crisis intervention and stabilization will include, but not be limited to:

- a. evidence of alcohol or other substance abuse/intoxication
- b. history of substance abuse, chronic substance use or dependence, which may have precipitated behavioral problems

- c. history of withdrawal signs and symptoms from drug use
- d. history of suicide threats or self-injurious behavior related to substance abuse
- e. current stressors (including major losses, exposure to trauma/violence, legal issues, etc.), which may have precipitated drug use/intoxication
- f. evidence of other reckless, impulsive, acting out behavior or loss of control related to above stressors
- g. other conditions related to substance abuse requiring continuous observation to determine need for admission to more restrictive level of care

Medical Screening. Medical screening services must be available on site 24 hours a day, 7 days a week by appropriately trained, certified and licensed clinical staff supervised by a qualified physician licensed to practice in the State of Tennessee and accessible within a time frame consistent with all applicable regulations. Medical screening services must include all services needed to: 1) determine a medical emergency does not exist, and 2) rule out clinical conditions which could mimic intoxication or produce erratic behaviors that could mimic psychiatric illnesses.

- a. The CAC must develop and implement an expedited procedure to accept responsibility immediately for clients who are transported to the CAC by law enforcement. The intake process must be able to simultaneously accommodate multiple clients.
- b. Upon arrival, a preliminary medical screening examination must be performed on each individual presenting for services.
- c. Adequate privacy must be afforded to patients including, but not limited to separation of male and female adult clients, as well as juvenile clients (ages 14-18) from the general adult population.
- d. To reduce transfers between providers, non-emergency medical conditions which may be encountered during the medical screening examination, must be treated on site (small lacerations, sprains, etc.).
- e. Appropriate laboratory testing must be available on site or by agreement with an external vendor to assess clients who exhibit psychotic behavior or evidence of intoxication. Laboratory testing must be timely and should not contribute to unreasonable delays in completion of the medical screening examination or mental assessments.
- f. Consultant will have an executed transfer agreement between the CAC and at least one (1) appropriately licensed emergency medical care service/facility to accept clients with emergent conditions.
- g. The CAC must perform substance abuse assessment as may be required on individuals presenting with signs of intoxication. Clients may self refer or be transported to the facility by law enforcement personnel, the CIT, family members or others.
- h. The CAC must accept clients who are intoxicated and transported by law enforcement for assessment in lieu of arrest in compliance with the provisions of TCA Section 68-24-507.
- i. The CAC must monitor clients including, but not limited to assessment of clinical condition and monitoring of vital signs throughout the social detoxification process.
- j. The CAC must ensure access to acute medical detoxification services as required by clients. Therefore, the CAC must have a written executed transfer agreement with at least one (1) appropriately licensed and certified facility that is qualified to provide such services.

- k. The CAC must identify and track high utilizers of CAC services with substance use disorders. They must be assessed for most appropriate intervention and follow-up services, including substance abuse treatment, primary health care and supportive housing.

Transition Planning. For individuals presenting with either psychiatric or substance abuse disorders (and with co-occurring disorders), who are *not* admitted for inpatient care, the provider will coordinate transition planning to include referral and linkage to community-based treatment services suitable to the needs of the individual for continuity of care, including crisis stabilization, respite, community mental health services and supportive housing as appropriate. The CAC must maintain an up-to-date list of available community resources, including treatment facilities, support groups, organizations providing assistance with housing and socialization needs, etc. The CAC will complete individualized disposition and/or transition plans for each client using a county-approved tool, e.g., APIC.

- a. Transition planning and continuity of care plan may require providing medication (up to 1 week supply) as needed to facilitate client transition to community resources.
- b. Transition planning should include identifying additional factors which might have contributed to the presenting crisis, i.e., trauma, abuse, chronic illness, etc.
- c. Transition planning and continuity of care plan must include specific follow-up referral information (location, date, time, contact person, etc.) and means for assuring clients' ability to keep scheduled appointments.

Transportation. For individuals presenting to The Regional Medical Center at Memphis (The MED) with either psychiatric or substance abuse disorders (and with co-occurring disorders), who are *not* admitted for emergency medical or inpatient care, the provider will coordinate transportation services to include transport to the Crisis Assessment Center or other community-based treatment services suitable to the needs of the individual.
